

The risk assessment questionnaire contains 6 questions that appear on page 2, and is designed to be administered to the parent by the healthcare provider. Questions are in English and Spanish to assist with Spanish speaking parents.

Instructions:

- This questionnaire may be used with any child, whether or not enrolled in Texas Health Steps.
- Medicaid requires a blood lead test for all Texas Health Steps patients at 12 months and 24 months. For children less than 6 years of age, complete a blood lead test at any first checkup after age 12 and 24 months if there is no evidence of a previous blood lead test.
- At any visit, you may choose to perform a blood lead test rather than use the risk assessment questionnaire.
- Refer to the table below for scheduling use of the risk assessment questionnaire.
- A “yes” or “don’t know” answer to any question on the risk assessment questionnaire indicates that a blood lead test should be administered.

Schedule for Blood Lead Testing and Use of Risk Assessment Questionnaire

Child’s Age	Parent Questionnaire	Blood Lead Test
6 months	YES	
9 months	YES	
12 months		YES
15 months	YES	
18 months	YES
